General Notes

1. The Net Asset Value (NAV) consists of all positions by financial instrument (stock, securities options, warrants, bonds, cash, etc.). All non-base currency amounts are converted to the base currency at the close of period rate.
2. The gain or loss from future contracts settle into cash each night. The notional value is used when computing the contribution to return.
3. Dividend accruals, interest accruals, and insured deposits are included in cash amounts throughout the report.
4. Price valuations are obtained from outside parties. Interactive Brokers shall have no responsibility for the accuracy or timeliness of any such price valuation.
5. Data from Thomson Reuters Business Classifications and Lipper Global is used to derive our sector classifications. Funds with assorted sector allocations are classified as Broad.
6. Amounts are formatted to two decimal places. If amounts are greater than two decimal places, Interactive Brokers uses "half-even" rounding. This means that Interactive Brokers rounds such amounts up to the nearest even number.
7. For accounts opened and funded before 2009, reports with a time period of Since Inception will only include data going back to January 1, 2009. This includes some default reports and both Historical Performance reports.
8. If you have elected to trade cryptocurrency/digital asset products at Crypto Provider through the Interactive Brokers platform, for your convenience your positions in your linked account at Crypto Provider are reflected in PortfolioAnalyst in connection with your Interactive Brokers account.

Section Specific Notes

1. Investment Themes: Theme information is derived from third-party data sources and has not been independently verified for accuracy, timeliness, completeness, or relevance. You should confirm the accuracy of any third-party data before relying on it. Theme classifications are not intended to imply any relationship to investment performance. All positions may not map to a theme. Companies are included in themes only when they demonstrate material significance according to the ranking criteria established by the third-party data provider. Companies that do not appear in any theme may lack sufficient thematic revenue exposure, strategic influence, or brand relevance to meet the provider's materiality thresholds or may be excluded from thematic analysis because data is unavailable for it. A single position may be included in multiple themes.
